

ReactJS frontend development

IDP - full-time/part-time in Munich

Develop into a kick-ass React developer by gaining first-hand practical experience during your IDP. You will not only have a steep learning curve by working closely with our CTO, but will also have a social impact by helping us solve the issue of personnel shortage in nursing.

Your role in a nutshell

- Develop a new feature to our application that supports the communication processes in hospitals
- Work with state-of-the-art Javascript frameworks like React and Meteor
- Plan your project independently but have full support from our dev team

What we offer

- Learn to work in an agile multi-disciplinary product team
- Have a steep learning curve working directly with our CTO and daily code quality reviews
- Great working atmosphere and a culture that strongly emphasizes learning, well-being and social impact

What we look for

- Advanced knowledge of javascript and functional programming
- Preferably first experiences with React
- Pride in being a good software engineer
- Willingness to learn and take responsibility for your goals

About Cliniserve

Cliniserve was founded in 2017 with the mission of building software for hospitals that reduces administrative and logistical work of care personnel. We have since then developed a SaaS software that is used by over 10 customers, including high-profile hospitals like the LMU University Hospital, Schön and Helios. Our founder team has studied in top universities like UC Berkeley, Georgia Tech, LMU, TUM and worked in organisations like TUM University Hospital, AWS and Personio.
