

Software engineer

Full-time in Munich

Be an integral part of solving a large societal problem while growing into an important role in an young and agile software firm. You will take over responsibility from day one and not only become a better software engineer, but also have the chance to grow together with the company into a leadership role.

Your role in a nutshell

- Develop new features and improvements to our application infrastructure
- Take the lead in long-term technology choices and system architecture
- Work with a MongoDB, NodelJS and MeteorJS stack and engineer it to perform at scale

What we offer

- Flexibel, autonomous work in an agile multi-disciplinary product team
- Steep learning curve and freedom to take responsibility and grow as much as you desire
- Great working atmosphere and a culture that strongly emphasizes learning, well-being and social impact

What we look for

- The mentality of an open-minded, driven and honest teamplayer
- Minimum 2 years of work experience
- Demonstrable experience working with MongoDB and NodeJS
- Pride in being a good software engineer in a world where everyone "can code"
- Willingness to set ambitious goals and take responsibility for them

About Cliniserve

Cliniserve was founded in 2017 with the mission of building software for hospitals that reduces administrative and logistical work of care personnel. We have since then developed a SaaS software that is used by over 10 customers, including high-profile hospitals like the LMU University Hospital, Schön and Helios. Our founder team has studied and in top universities like UC Berkeley, Georgia Tech, LMU, TUM and worked in organisations like TUM University Hospitals, AWS and Personio.
